The Strap-Fold

transmitterholder

Strap-Lox

leather straplock system

For best security, make sure there is no play between the end of the strap and the 'fold' of the Strap-Lox.

So, before installing, align the large hole of the Strap-Lox and the hole of the strap and fold the Strap-Lox around the end of the strap. The small hole which is now visible in the back should be used to attach the Strap-Lox to your guitar.
